

**Reciprocating Saw Blades**

Ordinary teeth deliver either speed **or** durability. **The AX Blade** with **Nail Guard™** solves this trade-off with an aggressive 5 TPI pattern for faster cuts and a unique design that protects against tooth fracture. And **Fang Tip™** bites into the wood on first contact.

**The TORCH blade** is designed for the toughest Fire and Rescue work, demolition, plumbing, remodeling or general metal cutting applications. Made to cut pipe, conduit, angle iron, steel and other hard materials, they are 1 inch tall for straight, fast cutting, and 0.042 inch thick for longer life.
