

## Strut

Contractors operate in a business environment where they are constantly confronted with risks, but they are ill-equipped to deal with the 30 percent price increase experienced in certain metals prices such as copper and steel in the last few years.

Steel is one of the most common raw materials and the most used metal in the world. With demand for steel heating up again, the question then arises: How can construction companies protect themselves from the rising price of steel?

One way contractors can control this risk is to turn to **DRIVEKORE**. At **DRIVEKORE**, we strive to offer consistently low prices on strut, threaded rod, hangers, and other essential jobsite materials that can fluctuate in price daily. You can count on us to have the items you need at reasonable prices.

### Stocked sizes of strut:
