

Extreme Makeover Home Edition in Etters

DriveKore was proud to play a part in the Extreme Makeover: Home Edition in Etters in June 2011.

Headed up by Musser Home Builders, thousands of volunteers worked day and night for an entire week to transform the home of Brian Keefer and his family into a residence more suitable for someone with his disabilities. Brian's dad, Steve Keefer, retired early to nurture his son Brian, a former star athlete who suffered a paralyzing gymnastics injury. The injury requires 24-hour care, and Steve's support will enable Brian to achieve his goal of graduating and living on his own someday.

Our participation in this Extreme Makeover is just one example of a local company supporting its local community!
