

Spray Foam Insulation

Powers Spray Foam Insulation

12 oz.

OR-6376750

\$4.75 per can

\$4.40 per can if you buy a case of 12

PowerFoam is a single component, moisture curing expanding polyurethane foam. The adhesive strength of PowerFoam allows it to be set on various types of building elements including concrete, brick, wood, metal, aluminum and steel.

When installing the foam, consideration should be given to the 2-3 times expansion of the foam after it leaves the plastic tube. The surface of the foam initially dries within 1-5 hours and becomes fully cured in 12-15 hours. The foam works best at room temperature. It is dispensed through a straw-like plastic tube that is packaged with the can.

The structure of the hardened foam provides excellent insulation against heat and noise. The foam has an R-5 equivalent value when used in place of traditional installation methods.

is now a

StanleyBlack&Decker

key brand.

Together with

they will provide "a comprehensive tool and anchoring package to the industry."
