Revolutionary Receiver Technology from Spectra Precision!

- Large Digital readout in both fractional and metric for quick easy to see readings!
- SuperCell reception height acquires the beam quickly!

Features

- Digital readout of elevation - No need to go "on-grade" to measure; saves considerable time
- Units of measure selection - Choose convenient units that are common to the user
- Large 5" (HL700) or 4" (HL450) SuperCell reception height acquires the beam quickly and keeps you in the laser beam
- Extremely tough - can withstand a drop of 10 ft (HL700) or 5 ft (HL450) onto concrete and
- Full length reception - time saving by easier and faster beam detection
- Large 21-channel linear LCD on front and back allows for fast readings eliminating the need to get "on-grade" to make measurements
- Multiple accuracy levels: 2 Audio volumes to fulfill all application needs
- Very strong housing - reduces repair and replacement costs
- IP67 for the best water and dust resistance
- Anti strobe sensor prevents false reading from job site strobe lights

HL450

\$244.⁰⁰

HL700

\$329.⁰⁰

Three-year 'No Excuses' warranty on both the HL450, and HL700 receivers!

LASEROMETER	HL450	HL700
SuperCell Technology	YES	YES
