

SERVICES PROVIDED

Pro-Cut offers an array of services to numerous industries. Some of the sawing and drilling services available from Pro-Cut include:

■ Core Drilling

Core Drilling, drilling of circular holes in concrete or other structural materials, is often used for waste water treatment plants, plumbing and electrical applications. At Pro-Cut we have both high-speed electric and hydraulic drills available.

■ Wire Saws

Diamond wire saws give us the ability to remove large sections of concrete and steel with very little noise. The length of wire is virtually unlimited, enabling us to make multiple cuts at one time.

■ Concrete, Steel, Asphalt, Brick & Block Sawing

- **Floor Sawing** is enhanced by our fleet of 72 HP diesel road saws, giving Pro-Cut the ability to saw heavily reinforced concrete, including bridges, highways, and airport runways. Our electric walk-behind saws, with their extensive size and voltage, are excellent for indoor use because they are exhaust free.

- **Wall Sawing** with our extensive selection of hydraulic wall saws allows us to cut accurate straight lines through materials such as stone, brick, steel and concrete; the wall saws are ideal for sawing doors and windows.
- **Chain Sawing** is ideal for small duct openings, creating square corners and eliminating overcuts.
- **Parapet & Curb Sawing** works well for bridge parapet, jersey barriers, curb depressions and ADA ramps.

■ Concrete Waste Removal

Innovative equipment and highly-trained employees allow us to handle rigging, hauling, removal and disposal of concrete waste.

These are just a few of the services Pro-Cut provides. We handle all phases of projects – from start to finish – in a timely, efficient manner. For more details, visit our web site at www.procutconcretecutting.com.

INDUSTRIES SERVED

Pro-Cut has been serving states along the East Coast and Mid-Atlantic for over 50 years. Pro-Cut is PennDOT pre-qualified and provides 24-hour, seven-day-a-week service, during plant shutdowns, off-hours, holidays and more. We have the ability and manpower to handle any job for many sectors.
